"Your petitioner," writes Hess, whose self-acquired knowledge of astronomy and means of information are very limited, is especially interested in the pending return of this comet, because, according to his moth er's story, one early morning in October, 1835, when a ten-months' old baby in his mother's arms she was greatly frightened by a sudden unexpected sight of the comet just rising over the roof of his native place at Armstadt, Germany. Afterwards his mother often told him that his baby eyes noticed it also and that he nearly jumped out of her arms trying to reach up for it and catch it with his baby hands.'
